BUNKER RAKES COMPARISON

THE CHIEF

Designed by a golf course superintendent to be used with the "Aussie Style" of bunker maintenance. This tine-less or "toothless" rake has two sides, a smooth side to help pack down the vertical sides of a bunker, and a side with ridges to rough up the bottom of the bunker without leaving large grooves in the sand.

- ▶ 20" (51 cm) rake head will come with one of 3 handle sizes, Green 54" (137 cm) Aluminum, 60" (152 cm) Green Gator Grip or 72" (183 cm) Green Gator Grip.
- ▶ Single tapping screw (included) is all you need for assembly.

TOUR PRO™

The stronger, lighter material has tines to help move deep sanded bunker sand into place. Flip over and the ridges smooth the playing surface without leaving the sand compacted and flat. Less expensive and a wider coverage than many of its competitors.

- ▶ 20" (51 cm) and 25" (63 cm) heads ensure tracks are covered with minimum effort, while pioneering design generates tournament quality surfaces
- ▶ When durability is a must, the exclusive Gator Grip handle is your best option, available in both 60" (152 cm) and 72" (183 cm) lengths. Also available with 64" (162.5 cm) curved aluminum and 54" (137 cm) composite handles.
- ▶ A single self-tapping screw (included) is all you need for assembly.

TOUR SMOOTH™ II

Performance of the original Tour Smooth Bunker Rake just got an upgrade. Improved rake assembly and the addition of the exclusive Gator Grip handle makes the Tour Smooth™ II a must for all courses.

- ▶ Smooths both fine and course sand into perfect playing conditions quickly and easily
- ▶ Pair the Tour Smooth™ II with the exclusive 60" (152 cm) Gator Grip handle for a level of performance unmatched by any of the competitors
- ▶ A single self-tapping screw (included) is all you need for assembly.

DUO-RAKE™

One side furrows and the top side smooths. The entire rake floats!

- ▶ 15" (38 cm) high-impact plastic head.
- ▶ Now with new stronger, gusset-reinforced high-impact plastic head.
- ▶ Bolt and cone (included) is all you need for assembly.

ECONOMY

Full size performance for smaller-sized budgets.

- ▶ 48" (122 cm) wooden or 54" (137 cm) ultralight, plastic-coated steel handles
- ▶ Tough, high-impact 15" (38 cm) molded head (and handle).

CART RAKE

When weight is the issue, the Cart Rake is the lightest you'll find.

- ▶ Impact-resistant, 15" (38 cm) polyethylene molded head.
- ▶ Redesigned neck for added strength and durability.
- ▶ 48" (122 cm) wooden handle.
- ▶ Perfect for golfers to carry.
- ▶ Fits in most golf carts!

IF IT STICKS TWISTS OR LEANS IT'S NOT A SMART-FIT

The ST2000 Cup and Smart-Fit Ferrule are the absolute best in the business—no other system comes close. Together, they lock in place to completely eliminate twisting and movement, keeping the flagstick perfectly upright and your turf protected from damage. With the ST2000's fins, dirt and debris falls straight through the cup, ensuring no sticking of your ferrule and cup. If you're serious about maintaining the highest quality course, these are a non-negotiable. **#SetTheStandard**

Standard Golf's ST2000 Smart-Fit™ Cups come with three configurations: aluminum, plastic and "hybrid" with an aluminum base and plastic molded walls to combine the best of our aluminum and plastic models.

BEST VALUE

Set of 18 Cups + 1 Cup Setter

Standard Golf's Aluminum ST2000 Smart-Fit™ cup, MagnaTech™ Budget Cup, and Aluminum Cup are each available in sets of 18 cups with 1 cup setter for the best value.

Our cups are made with MagnaTech™, our proprietary aluminum blend, with more silicon and less copper, making them stronger and less corrosive.

Setting the Standard in Golf Course Accessories since 1910.

400 DENIER VS. 200 DENIER FLAG FACTS:

FACT #1

Sometimes less is more. 400 denier is relatively new to the industry and typically used on sailboats.

FACT #2

The purpose of a golf flag is to show where the cup is and to help golfers judge wind speed. It takes a 7 to 10 mph wind to get a 400 denier flag waving. It takes a 3 to 5 mph wind to get a 200 denier flag waving.

Advantage: 200 denier. Plus, the heavier 400 denier flag wears out ferrules flagsticks and cups quicker.

FACT #3

Golf flags are meant to fly. Sails are meant to propel sailboats. One has nothing to do with the other. So trust us when we tell you the only time we recommend 400 denier is usually when we're talking to sailors, not superintendents.

SUPERINTENDENTS & PLAYERS ARE **NOTICING A DIFFERENCE WITH GREENACTIVATOR**

MORE ROOT MASS, IMPROVED STRESS TOLERANCE, INCREASED
SOIL MICROBIAL ACTIVITY & MORE SOIL-AVAILABLE NITROGEN
BACKED BY SCIENCE.

"With GreenActivator, I've noticed much lusher fairways. **For me, it was like mowing on a cloud because the grass was standing up.** The grass is thicker, but not higher, so the ball sits up better for golfers and improves playability. I get positive comments from golfers constantly."

Scott Rohlfson

ACCORDING TO ADAM THOMS, PH.D., HIS IOWA STATE RESEARCH HAS CONFIRMED THAT ADDING HUMIC ACID RESULTS IN:

MORE ROOT BRANCHING

which means better water absorption, better nutrient uptake and increased drought resistance

INCREASED MICROBIAL ACTIVITY

which results in a healthier soil and root zone

IMPROVED STRESS TOLERANCE

that equates to faster recovery from turf damaged by traffic, divots, or ball marks

MORE SOIL-AVAILABLE NITROGEN

enabling the reduction of synthetic nitrogen by 25%

NATURALLY HEALTHIER TURF THROUGH BETTER ROOT DEVELOPMENT

Iowa State University's (ISU) turf management team led by Adam Thoms, Ph.D., and, at the time, grad student AJ Lindsey, Ph.D., now an Assistant Professor at the University of Florida, have been studying humic acids on turf for years and in 2021 began incorporating GreenActivator into their research trials. In 2023, Virginia Tech and Texas Tech completed research validating Dr. Thoms and Dr. Lindsey's results. #GrowTheBestTurf
